Day10: final day!!!!

1. As you have reached the final day I assume that our study material and the self study would have helped you learn Java at a beginner level and for the very final day I'll help you do the basic project using mysql to create a Student database management system

2. Below i'll provide you with the steps to do this project and your final assignment would be to watch the video and complete the remaining project

3. First you need to install xamppp on your system , installation link is provided to you below.
   - https://www.youtube.com/watch?v=-f8N4FEQWyY
   - Link to download xampp
   - https://www.apachefriends.org/download.html

4. you need to download phpMyAdmin on your system
   - https://www.phpmyadmin.net/
   - Below is the link to guide you how to install myphpadmin on your system
   - https://www.youtube.com/watch?v=KFYXY3MT-XA

5. After this make sure you have netbeans IDE to make it easy to create the forms

6. https://www.tutussfunny.com/jdbc-crud/

7. Above link contains more detailed steps to create the jdbc crud operation projects

Assignment for day10

➢ You need to go through all the steps and create this project and submit the source code of the project and 2-3 screenshots of the running project on the Google Classroom by tomorrow

➢ NOTE:

➢ The students who have submitted 4 or more than 4 assignment(uploaded to google classroom will get the participation certificates)

➢ Also, those who have successfully created the Day10 project and other days progress will be shortlisted for the next event
